VINCENT TAO

(+64) 21 0826 1077 | vincent.jh.tao@gmail.com | LinkedIn | GitHub

EDUCATION

University of Auckland | *Bachelor of Engineering & Commerce* *Final Year Student* | **Auckland, New Zealand**

- Majors: Software Engineering & Finance, GPA: 7.7/9 (86%)

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | *YX Studio* *Nov. 2024 – Present* | **Auckland, New Zealand**

- Developed a clinical management platform with Next.js, React, and Prisma (MongoDB) to streamline patient insurance claim workflows, reducing processing times across 60+ clinical service providers.
- Implemented a duplicate-patient prevention feature that resolved 300+ existing duplicate records and introduced validation safeguards to improve long-term data integrity.
- Optimised state management using Redux and Apollo Client to reduce re-renders and improve UI performance.
- Revised GraphQL queries and Prisma schemas to improve data retrieval efficiency, reducing response times and improving page load performance by up to 30%.

Project Manager | *Web Development & Consulting Club* *Jan. 2025 – Dec. 2025* | **Auckland, New Zealand**

- Led 10 developers to design and deploy a production-ready full-stack website for a 300-member university club.
- Directed Agile sprint planning and retrospectives, leveraging Jira and Confluence to coordinate development and deliver the project within academic term deadlines.
- Defined frontend-backend architecture integrating Next.js (React, TypeScript) with Payload CMS to establish a scalable and maintainable content management system.

Software Engineer (Intern) | *Univers* *Nov. 2023 – Feb. 2024* | **Singapore, Singapore**

- Built 15+ cloud-based automation solutions using Microsoft Azure Functions and Power Automate, reducing manual workflows by 70% and improving real-time data integration for energy management systems.
- Optimised large-scale MySQL databases through indexing and partitioning strategies, improving query performance by 20% to support AI-driven decarbonisation analytics.

PROJECTS

Automated Court Booker | *Python, AWS Lambda, REST APIs* GitHub

- Deployed a serverless court-booking app on AWS Lambda and EventBridge, achieving <2s execution time per run.
- Designed a low-latency pipeline using direct REST APIs to handle authentication, booking, and payment.
- Implemented a sliding-window algorithm to identify contiguous booking slots for optimal booking efficiency.

University of Auckland Club Website | *TypeScript, React, Payload CMS* GitHub

- Developed a full-stack website for a 300-member club using React and Payload CMS, allowing non-technical administrators to manage club information, events, and sponsors via a headless CMS architecture.
- Implemented interactive UI features including parallax scrolling and lazy-loaded animations to improve perceived performance and user engagement.

Flashcards Library | *Vue 3, Node.js, Express, Prisma, SQLite* GitHub (FE) | GitHub (BE)

- Built a full-stack flashcards library enabling deck creation, editing, and study workflows by developing a Vue 3 frontend and a RESTful Node.js/Express API for scalable deck and card management.
- Designed relational data models and CRUD APIs using Prisma (SQLite) and implemented centralised API handling in the frontend to ensure maintainable client-server state synchronisation.

EXTRA-CURRICULAR

National Representative | *Badminton New Zealand* *Apr. 2017 – Present* | **Auckland, New Zealand**

- Oceania Championships 2025 – Mixed Doubles Gold Medallist, Men's Doubles Bronze Medallist.
- Prime Minister's Athlete Scholarship Recipient 2025.

SKILLS

Programming: Python, TypeScript, JavaScript, Java, C++, C, SQL, MATLAB.
Technologies: React, Next.js, Vue, Redux, Tailwind CSS, Node.js, Express, GraphQL, Prisma, MongoDB, MySQL, SQLite, AWS Lambda, Microsoft Azure, Git, Jira, Confluence, Figma.
